

I-8037 I-8037-G

16-ch Isolated DO Module

Features

- Source Type Digital Output
- Photocouple-isolation protection
- ±4 kV ESD Protection
- Short Circuit Protection
- 3750 VDC Intra-module Isolation

Introduction

The I-8037 provides 16 channels for Digital Output, each of which features Photocouple-isolation. The I-8037 supports Source Type output with short circuit protection and each channel can drive 100 mA load. There are options for confi guring power-on and safe digital output values. ±4 kV ESD protection and 3750 VDC intra-module isolation are also provided to enrich the noise protection ability for industrial environment.
