Tiny Modbus/TCP to RTU/ASCII Gateway

FAQ

1.

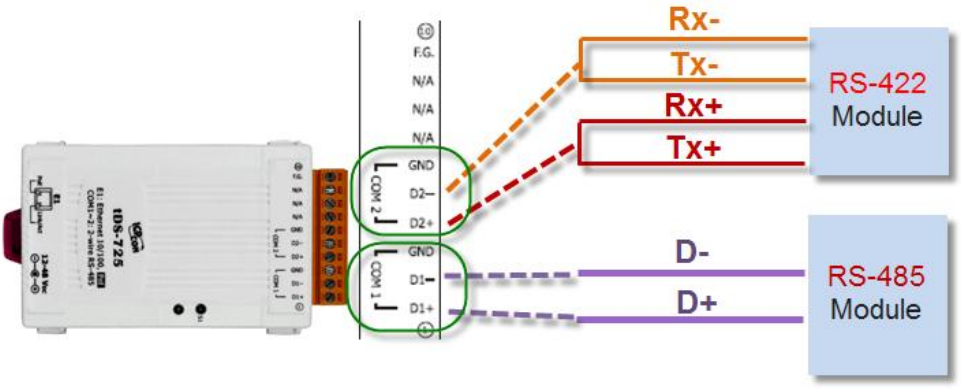

Q: Can RS-422 and RS-485 devices be wired (mixed interface) to the same RS-485 port of tDS-700/tGW-700?

A:

1. Some RS-422 devices don't support RS-485 wiring; please make sure their specifications. Or you can also wire only RS-422 device to RS-422 port.

2. Some RS-422 devices can work in RS-485 wiring, but this way may interfere with the other RS-485 devices on the same port.

   2.A: We recommend that the RS-422 device should wire to a separate RS-485 port (For example: Select multiple RS-485 ports version of tDS-700/tGW-700).
