Q: How do I upgrade my DAQ Card from the PCI bus to the PCI Express interface?

I already have a DAQ card that uses the PCI bus and I want to upgrade it to the PCI Express interface version. However, I do not want to change my original software and hardware configuration (e.g., wiring and source code, etc.). How do I know which card to choose that will be compatible with my original card?

A: You should refer to the compatible product selection guide for DAQ card to determine the most appropriate replacement device. The selection guide provides detailed compatibility information related to the hardware and software functions and pin assignments, etc., and can be found at:
http://www.icpdas.com/root/product/solutions/pc_based_io_board/pci/pdf/PCI_Compatible_Product_Selection_Guide.pdf

If the above list does not contain a product that matches for your needs, or if you have any questions, please feel free to contact us by email at:
service@icpdas.com or service.icpdas@gmail.com
