Q: How to download a program image into a TPD-283 device without HMIWorks.exe?

A: Users can use eflash.exe to download a TPD-283 program image.
Find an eflash.exe at **C:\ICPDAS\HMIWorks_Standard\bin**.

A usage example of eflash.exe:
eflash -i 169.254.19.63 --mac=00.1a.b6.00.12.04 test.bin
where

1. 169.254.19.63 is the user-specified IP string (only for downloading; the run-time IP address is contained in the program image),
2. 00.1a.b6.00.12.04 is the MAC address which can be found on the back panel of a TPD-283 device,
3. test.bin is the program image.
