作者/Author		日期/Date		編號/NO.	FAQ010

Q: How does a third-party proprietary protocol work with TPD?

A: TouchPAD has a free software development tool, HMIWorks, in which we provide the UART/TCPIP API functions for users to control the communications through RS-485/Ethernet.

For TPD to be compatible with others, use these API functions to code for any third-party proprietary protocols.

Visit the link below for the API reference:
http://ftp.icpdas.com/pub/cd/touchpad/document/english/api_reference/
