Q: Does WISE support any function for math calculation?

A:

WISE-523x supports math formula editing function after the firmware upgrade version 1.3.0. Users can set I/O channels to be the variables, and use the following operators to edit the formula: plus “+” minus “-” times “*” divide “/” superscript “^” left parenthesis “(” and right parenthesis “)”. Users can edit different formula in each Internal Register. WISE will calculate the results of all formulas repeatedly, and save the results into the corresponding Internal Registers for IF-THEN-ELSE rule checking or data logging.

Please refer to the step-by-step document.
