Q: Google Chrome's update causes the WISE setting page being opened abnormally.

A:

Due to some functions being removed from the latest version of Google Chrome browser; it may cause the setting page of WISE controller being opened abnormally if you use the latest version of Google Chrome browser as Web Page setting browser. Please use IE browser or Firefox browser as the replacement to work with WISE controller, or update your WISE controllers with the following firmware version(or above) to fix this problem:

- WISE-71xx：v1.2.6
- WISE-7901：v1.2.6
- WISE-580x：v2.5.0
- WISE-580x-MTCP：v2.8.6
